

Fallen Timber Farms & Polar Farms

SPRING SELECT

SIMMENTAL

RED, BLACK & FULLBLOOD

Bull Sale

**MONDAY, MARCH 3, 2025 - 4:00 PM MST
DAWSON CREEK EXHIBITION CATTLE BARN
DAWSON CREEK, BC**

Join us at 4:00PM on Monday, March 3rd, 2025 at the Dawson Creek Exhibition Grounds for the 12th Annual Spring Select Bull sale hosted by Fallen Timber Farms and Polar Farms. Enjoy a Brisket dinner following the sale and take advantage of the opportunity to view the bulls, which will be penned inside for your convenience all day Sunday March 2nd.

A true family-run operation, Fallen Timber Farms embodies the values of hard work, dedication, and community. The Jans family's ranch thrives with the active involvement of their sons, Taos, Rhett, and Nash, who are integral to the day-to-day operations. Each of the boys is a proud and active member of their local 4H club where they are developing their own cow families and herds. In fact, as you browse through the sale footnotes, you'll find bulls owned by the kids—a testament to their commitment and passion for the industry. The Jans family has once again delivered a remarkable group of bulls that embody the resilience and adaptability required for success in the Peace Country. These bulls are responsibly developed and built to last, focusing on structural soundness with a good foot. These cattle are designed with the commercial cattlemen in mind, offering diverse options in red, black, and fullblood genetics. Sired by proven herdsires, including MRL Authenticator 16J and Crossroad Black Construido 85k, ensuring power, calving ease, and exceptional growth potential in your next calf crop. The Jans family's dedication and thoughtful breeding approach continue to provide high-quality bulls that will excel in diverse environments and deliver value to their buyers.

A relatively new name in the industry Polar Farms has quickly gained recognition for its commitment to quality and progressive breeding practices. Now in their third year at the Spring Select Bull Sale, Joe and Lindsay continue to push their program forward with impressive results. When the opportunity arose to acquire a group of elite Skywest Fullblood cows, Joe seized it, and the resulting bulls are a testament to that strategic decision. These fullblood bulls represent the strength and future potential of the Polar Farms breeding program, offering both cattlemen and breeders an exciting opportunity to enhance their herds. This year, Polar Farms presents a diverse lineup of red, black, and fullblood bulls, including standout individuals that are hard to overlook. These bulls combine power, structural soundness, and versatility, ensuring they'll fit seamlessly into any program. Polar Farms is a name to watch, and their offerings at this year's sale are sure to leave a lasting impression!

We look forward to seeing you sale day! If you're unable to attend in person, the Transcon Livestock team is here to help! Feel free to contact any team member for assistance or to utilize our conflict-free absentee buying service.

DELIVERY/WINTERING

There will be at \$250/head discount for all bulls picked up Sale Day. We will make every effort to get the bull to your yard or the nearest central shipping location free of charge within BC/AB. Any additional 3rd party trucking costs/arrangements etc. will be done so at cost. Bulls may be returned to Consignor's Farm free of charge until Apr 15. If additional arrangements are required please contact the Consignor directly. All animals returning to Consignor's Farm must be insured, and are left at owner's risk. Should any bull fail to be a satisfactory breeder, he will be replaced with a bull of equal value and quality at sellers' discretion, or a credit will be given towards the purchase of another consignor bull. In no event shall Fallen Timber Farms or Polar Farms be responsible for reimbursing more than the purchase price. No Refunds.

Fallen Timber Farms Herd Health

All Fallen Timber Farms cattle follow a strict herd health vaccination protocol, with the following administered according to age. Horned animals are dehorned at birth, and any regrowth addressed at again at branding/weaning. Feet are left in their natural condition to provide buyers an opportunity to appraise shape for themselves. All bulls will be semen checked, palpated, scrota measured and vet checked.

At Birth

- Nasalgen
- Toltazural
- Selenium&E
- Vitamin A&D

At Branding (Apr 6th)

- IBR/BVD/Leptospirosis - Express FP 5-VLF
- Clostridials - Fermicon 7 with Somnugen
- Internal/External Parasites - Eprinenx

At Weaning (Sept 14th)

- IBR/BVD/Leptospirosis - Express FP 5-VLF
- Clostridials - Fermicon 7 with Somnugen
- External Parasites - Cylence

February

- Internal/External Parasites - Ivermectin

The bull feeding program is built to maximize forage utilization, gut health and as a result quality sperm production. Nutritional status of a bull, particularly from the previous 60-days, can affect the semen quality being ejaculated today. Sperm production is a continuous process and proper nutrition is critical to maintain peak fertility and longevity of bulls. Bull calves are generally developed on grass with their moms on a quality mineral program.

Once bull calves are weaned, they are slowly moved onto a balanced TMR. The bulls are challenged with a forage-based TMR to help them develop and express their genetic potential. This is important for consistency of maturation and puberty of bull calves. Sampling and analyzing forages are important for properly balancing the overall ration. Forage quality and digestibility are important for maximizing ruminal health. Matching suitable protein sources with proper starch with the available forage sources is key to promoting lean muscle growth. The addition of organic minerals are used to ensure proper immune function and overall health of bulls. All of these factors contribute to semen quality and conception within a herd.

If you have any questions about the nutrition program, please feel free to reach out. Buy with confidence knowing the bulls have been developed on a balanced nutrition program. Best of luck on sale day!

© More Than Just Feed

Welcome

A young boy with dark hair, wearing a grey t-shirt with 'FBI' printed on it and blue jeans, stands next to a large brown cow. The cow is wearing a white halter and a lead rope. They are in a fenced-in area with straw bedding. In the background, there are trees and a fence.

A photograph of a man wearing a cowboy hat, a dark long-sleeved shirt, and blue jeans with a large silver belt buckle. He is standing next to a brown cow in a field with tall grass and a line of trees in the background.

Our offering for 2025 is as deep as we have raised, with our black pen being the strongest set raised at FTF to date. Detailed study and investment in the right genetics for our herd is paying off in spades, and we sure are excited for the astute Cattlemen appraising the offering to get eyes on this crop.

Respectfully,
Chet, Jamie, Taos, Rhett & Nash Jans

Polled Purebred

The lead of bull in this year's class is a real whopper off of a never miss Arizona cow owned by our oldest son, Taos, and our new up and coming herd sire, Crossroads Construido 85K. Legend's dam 447E is a perfect footed and uddered female that is a pleasure to have in the herd, and is considered in our household as our best black female. Legend is a meat machine with length of spine to spare, perfect leg set, and an impressive top. This bull is athletic as they come, and will most definitely cover some ground in a big pasture setting. 90L definitely comes up when the pails are out, but won't be your club project. Cowboys take a long hard look at this sale feature.

Homo Polled, Hetero Black

107M has been a pen favorite since day 1, and sure caught some attention this summer by visitors. His perfect blaze face is the icing on the cake when appraising his excellent leg set, long spine, ample quarter, and wide top. I really appreciate these herd style bulls that seamlessly carry their muscle all while maintaining a smooth front third. Longevity and strong maternal traits are built right into this pedigree. Magnetics' momma is a foundation female from a cow family that has a continuous presence in our footnotes, 4A, 78X, going all the way back to our 99R cow! 424E is a moderate framed female with excellent feet and legs and an awesome udder.

Homo Polled, Homo Black

Malek has eye appeal and style that always make me take another look when we are in the pen. He is a smooth made easy travelling bull that is really hard to fault. His sire, Construido is rising to the top of the herd sire pen, as his progeny are so well stamped, and just plain work. Great feet, extra stretch, and ample muscle all with a good northern hair coat – these sons are sure to go to work in most any herd. 152M's dam is a sweetheart MRL female that has a tidy udder and good feet and legs.

Studley – the name says it all. This calf was born a herd bull and has had that presence since the day he was born. On pasture this summer he was sure he was the main man, strutting out and calling to any ladies that would listen. Big hip, top, and a spine that goes on and on, Studley is set up. 81L's dam is a thick black cow that has the typical Arizona foot and udder shape...steep square feet, and a square bag always full of milk. Studley's sire, Authenticator is our main walking sire and sold several top end bulls in last years sale, with this year's offering being as consistent and exciting. On the EPD end of things 81L is above breed average in 12 out of 13 traits, with a CE in the top 2% of all registered Canadian Simmentals. Coming into the world at 86 lbs, and gaining hard through weaning into his yearling class, Studley has both performance and calving ease.

Hetero Polled, Hetero Black

83L is a pen favorite at feeding time each day, as he is so chill and just loves his tail rubs. His easy disposition is an added bonus when looking at his attractive skull, tidy front third which sweeps into a great spring of rib section, and finishes in a nice deep quarter. The typical Authenticator chrome makes him flashy as can be. Pedigree wise – Lewis is stacked. His Whiskey dam is a member of a foundation cow family going back to the great 13Y cow which just departed the herd in the fall. Strong feet legs and tidy udders run deep on the bottom side.

Hetero Polled, Hetero Black

Here is another awesome Authenticator son, with a big top and excellent hair coat. His makeup is so typical in terms of Authenticator's style it is hard not to be redundant in describing his attributes. On the dam's side this first calf heifer did a whale of a job on her first at bat, raising a calf from 76lbs to 760lbs in severe drought conditions, all while holding shape herself. The bottom side of Miko's pedigree holds a nice outcross twist that most herds won't see, going back to our great NorthStar Rendezvous Bull whose dam (49E) recently commanded top dollar at the Rendezvous dispersal. Deep in this pedigree is our now deceased but infamous KSK Destiny 33U cow, that has many females working in our herd. Rock solid maternal traits that will work in any herd.

Polled Purebred, Hetero Black

A solid black edition Authenticator calf here, smooth made, long spined and generally consistent in body depth front to back. This bull has great neck extension and sweeps this smoothness into a soggy middle, that makes me happy to see when the -30C sets in. Coming from the aforementioned Destiny cow family (his Granddam) the maternal strength in this pedigree is stellar. His own dam 335D is a real bull maker with all of her registered calves to date being bulls, and several of them working big ranches right here in BC, which is a testament to the travel capability and hardiness in the bloodline. Here again on the Authenticator page – EPDs are curve bending and worth a long look on sale day.

Polled Purebred, Hetero Black

All the Authenticator progeny possess way above breed average calving ease, and from experience we see this breeding true, but Max is in a league of his own when it comes to a heifer style bull. Another calf from our oldest son's herd, Taos is extra proud of his first calf heifers' job on this late born calf. The dam 984k goes back to the dam of the lot 1 bull, so great maternal, feet and udders are built right into this guy. Max fits right in with the big boys of the pen, and already has the herd bull look when he is eyeing the replacement girls next door. His smooth make, yet loose soggy make up are great attributes, that make me excited to see being passed on in his future herd.

Homo Polled, Hetero Black

The first set of Stratton bull calves have finally hit the catalogue, and what a splash they should make this year. The first one cataloged is a black fella that is the real deal. Length mass, deep quarter, and herd bull presence, all packaged up smooth as the house cat. As I write this description, we just came in from the nightly pail feeding in a full-blown blizzard, and I can picture this bull perfectly at the trough...he is really turning it up a notch right now, and unlike the people on the pail end of the trough, is totally unbothered by the elements. Cow families right here again from a sweet Arizona dam and our old 4A cow. Mavericks' moderate framed black dam is a good uddered female with strong feet and an excellent attitude.

I cannot take my eyes off this bull when Mackinnon gets moving around the pen. His hip shape and quarter just pop for me when he strides out – a very attractive round shape in the muscle expression that we don't see a lot of in our black pen. His top, length and general geometry in his front 3rd make this a bull that deserves some review come sale day. Sired by our now deceased McDavid son from Deeg's, Mackinnon is royally bred. On the bottom side Mackinnon's dam is a maternal Anchor D momma cow moderate in frame, with a bag right full of milk.

Homo Black, Hetero Black

Chrome edition McDavid son for appraisal in Lot 11. This attractive smooth made rascal is a bull that would likely fit into most any herd, coming into the world at a meager 88lbs, his versatility potential is certainly worth consideration. A rib extra in length, Mackinnon has the stretch to add a few pounds to a steer crop. The dam on the bottom side (251C) is a big middle female with a ton of milk, and trouble-free feet and legs, a big broody momma cow that excels in the bush and the rough pasture.

Hetero Polled, Hetero Black

Here is a real twist on the black pedigree, with a half fullblood solid black bull in a nice smooth package. I spoke previously about how pleasing it is to see these bulls with round muscle shape in the quarter rolling off a long hip, and Maynard is certainly showcasing this trait. His big black foot is an added bonus and really seals the deal on this hard to fault outcross future sire. We lost Madden (sire) this fall, so there are limited opportunities to grab a son going forward, but we have used him extensively in both our purebred and fullblood herds. His remarkable ability to pattern progeny solid or with blaze in the purebreds is simply amazing. Maynard's dam is a perfect footed Arizona female with a great bag, and hardy makeup. She is broody as they come and consistently raises the right type.

Hetero Polled, Hetero Black

Maurice is another black outcross you likely won't see replicated in the catalogues this spring. 131M has a strong purebred pedigree going back to our infamous Rockstar Capone bull and the great 45Z cow who just calved her 11th calf the other day. One step further back and we see the matriarch AEDJ 12U, a pillar in our herd for many years. Maynard's dam is a never miss black Capone addition that we just love. Calving ease, fault free bags, feet and legs, and longevity – the cattle type that make money – all programmed into this bull. I really like the skull on 131M, as it is so sleek and tidy – an attractive presentation with some hopeful added benefit in his progeny at calving time. 131M is not the pen pet but is certainly manageable, as Jamie can attest to when Maynard decided the wagon was a great rubbing post as it entered the heifer pen, and she was left to sort him out of 50 yearling heifers by herself! This being said I think he would work best in a group setting, as he is more comfortable with a friend.

Rounding out the black section this year is a really catchy blaze bull that just clicks. Hip shape, stretch, depth, feet, legs, motion, it all gels on Laser. Another fullblood black outcross pedigree back to our Wolfe heifer bull and a super correct NorthStar black first calf heifer. Laser's dam did an outstanding job on this guy when looking BW to WW, and it's the heavy milking cow family in the background I am sure assisting this outcome. I spoke previously about our 251C cow, and this maternal strength shows up in 85L. The numbers speak for themselves, and the EPD's on this dude are real curve benders especially in a 31/32 bull. Take a good look at this guy on sale day.

Homo Polled

Kicking off our red section is a smoke show of a Construido calf with a perfect blaze face and style to burn. Makar is a real pounder off of a sweetheart Capone female that is a household favorite. His dam 730H is a red blaze herself and is a total doll in the pen, playing the role of nanny to all the new babies. The boys just love this cow as she raised a draft calf in the past that ended up being our youngest son Nash's club project. Pretty great temperament when a 6-year-old can lead a new calf with a nanny momma cow at side. Tremendous maternal coupled with sheer performance make Makar an undisputed sale feature. Pussy cat demeanor, big leg structure, huge feet, a full well rope long spine, and a northern hair coat – what more could you ask for? The number spread is strong on 134M and he displays a true power EPD set.

Homo Polled. Twin

For those ranching in the north – this name is you – I couldn't help myself. What a cool bull right here. 101M is an easy doing fleshy bull that has this Construido presence about him – they just stand out. His natural dam did an awesome job raising 101M. Correct structure and feet run deep in this pedigree as the 516E dam is off what I consider, the best cow we have ever owned – TYS 812U. When I mention udders, feet and legs – 812U was flawless right to her departure from the herd at 14 years of age. Her shape and capacity were unrivaled by any cow at any age, and 516E is right there in that department. This could be a sleeper bull folks, so please take a long look at lot 16.

Polled Purebred

Maddox is the full package in terms of phenotype and genotype. He is hairy, deep, long, loose made, correct and travels out beautifully. Ample quarter and a big top flow flawlessly in body shape from a tidy front third with an attractive slender skull. The Authenticator calves are so good, we really believe every herd should have one working. Calving easy with a low BW and growing hard on momma is what it's all about – less work when the nights are already long, and lower inputs once the calves are growing are the hallmarks of increased return on investment and the numbers in these calves are just right – the EPDs are bang on – real curve bender statistical predictions that breed true. Maddox dam 112B is a foundation female in her own right back to 43W and the original Copper 119T. This line is a female builder with daughters that repeat what 112B is doing. Big time feet and udder quality in this pedigree. Just can't say enough about this bull, so make sure you star your catalogue.

Polled Purebred

Nash's old 401D cow did it again! She is literally a bull factory, calving just as I write this description with another ripping red bull calf. Loyal is a pen topper in terms of presence and performance. I am repeating myself over and over again, but these Authenticator calves are so easy doing at birth and just grow. 69L is a long long bull with a huge hip and an outstanding top line; so attractive and appealing to look at. He is certainly a frame score larger in our pen, and this added mass shows up on the scale in both WW and YW. On the dam side – I have written about 401D many times over the years and the talk up is the same, feet, udder and maternal strength, adding a rib in length adds pounds and the 401D cow sure plants that into her progeny. For those studying pedigree you see a couple famous animals on the bottom side, both Red Rocket and especially the Erixon 2P cow, who is regarded in industry as one of the most influential cows in the breed. This bull needs a long look.

Nash's second bull calf on offer this year is a near identical description to Lot 18, as the first calf heifer raising Luca is a daughter off of 401D. See the comment on lot 18 about bull factory...these girls sure make them right! Luca is a tick more moderate in his make up than lot 18, but has all the same attributes in terms of do-ability and growth. Coming into the world at 80lbs and never looking back, Luca is a calf that we really appreciate in the pen. Long made smooth and set up with an unrivaled calving ease EPD set with 11/13 traits above breed average. The snip of chrome from Authenticator is icing on the cake. Luca's dam 945K is a super correct big middled NorthStar female who has a promising future in the herd, and should make Nash a few bucks over the years – shaping up to be a good type of brood cow.

Polled Purebred

Mario is the youngest bull on offer in the pen and will just be 12mo on sale day, but fits right in with the big boys in terms of muscle expression and structure. A true heifer style bull in phenotype and on paper, Mario is royally bred with the great Authenticator and a fabulous Whiskey female raised by non other than the TYS 812U cow. Such a slam dunk on the maternal and the calving ease, I surely hope this bull finds a heifer pen this year to go to work in, as the genetic potential is just huge. Mario's dam 836J, is a moderate made female in line with him, and has the stereotypical udder and leg set up passed on by 812U. Heifer bull worth a second look.

Homo Polled. Miller time! 108M has this great Stratton look to him that we are certainly enjoying from our LRX 17J sire. Dark red, thick thick, and hairy with a steep foot – we sure like what is hitting the ground off of him. Miller is a fleshy easy doing bull that is consistent with his sire and dam. He is so thick front to back, he almost doesn't show as long as he really is, but the top in this bull when looking end on seals the deal. Can't wait for the video on this bull, as he has herd sire written all over him. The Anchor D 7C cow has had few calves through the sale ring over the years and just looks great in her own right, always holding condition and raising the big ones through many years of continuous drought.

Homo Polled. Matthews is a liver red bull that is extra stretchy but carries his flesh deep in the quarter. I sure like this bull and have really started to admire him more and more as he develops. I really like the leg set on the Stratton progeny as their tracking is ideal, and the foot shape is big, both front and back. This is something we really focus on, as the wheels are the most used component in this rigging, and without good rubber – you are stuck! The 771H dam is a well-bred moderate liver red female from the well-known Red Mountain bull, back to the aforementioned 251C cow way in the background. Heavy milking foundation sort of pedigree. 116M is better than his picture, so be sure to watch for the video.

Polled Purebred Merrick is a deep dark red soggy bull that is easy to pick out each day when feeding. He has a nice straight hair coat that is fancy as can be. The big hip and ample quarter downloaded into him from Stratton is much appreciated, and certainly makes for an extra check mark when appraising him against his peers. I love the skulls and front thirds on these Stratton calves; it really completes the package. His KRSS 59E dam did it again on the bull front, as she has raised past high sellers in our sale, and I believe the astute cattlemen studying this set will agree that 127M is a note worthy bull at the front of the pen. 59E herself is moderate, tidy uddered and perfect footed.

Polled Purebred

We have 2 bulls in the sale this year off of our new walking sire from Maxwell's, Mr. Jones. True to form for the Brooks progeny working in industry already, Mason is a long bodied, deep, muscled up Mr. Jones son with a beautiful front third and excellent stance. His red momma cow is a big middle hairy girl that loves life in the north and travels out on a big solid foot, and carries a nice square tidy udder. Mason himself is a gentle bull with what seems like an extra foot in spine to him, and a very balanced EPD set.

Hetero Polled

Morris is a real character, and there seems to be one in each pen we raise. We pail feed our bulls daily and Morris is the first bull to the tail gate for a rub, and an attempt to spill the pails on the tail gate that the little boys pass to Jamie and I. He thinks this game is quite funny, but after a few months of it we are really excited for him to find a new set of pails to spill. Jokes aside, Morris is a long spined Jones son with excellent feet and legs and a ton of mass. He pictured like a golden retriever as he is so chill, so again - watch for the video. On the dam side I recently spoke about the legendary AEDJ 12U cow, and in the background to Morris's dam 627G you will see her. 627G is a flush worthy cow with perfect rigging in all regards, and a beauty red blaze. EPD spread is rockin' and I think this is a sleeper sale feature right here.

Polled Purebred Malt is a big topped, huge hipped moderate framed red bull with a lot of style, and would be a bull I would think could go to work in many different herds. He has such a nice head on him rolling along into a great neck section and smooth shoulder. He is a big middle bull that is surely a direct trait passed on by our now deceased walking sire MRL Whiskey 54D. Whiskey sired many great herd bulls over the years that passed through our sale ring, and I am proud to have his final natural bull calf on offer in our 12th sale. Malt's dam is a moderate made Daredevil female with a few daughters working in our herd. Good trouble-free momma cow that is hard to fault.

Polled Purebred We purchased Mulder's dam from the 2023 Pasture Treasures sale at Anchor D, and are thrilled with her first calf. This dark red heifer type Sleep Easy bull is an excellent example of calving ease traits at work and being passed along. Nice long cannon bones and short jaw line coupled with a narrow angular skull, makes for a dream combination working in a heifer pen, and Mulder has these attributes. His 488K dam is a beauty Anchor D female off of their Wilson walking sire, and he sure passed on a square steep dark foot to her. She is a big middled girl; hardy as can be and fits right into the program at FTF.

Polled Purebred. Here is another great example of fullblood breeding going just right in our purebred program. Major is a really unique looking bull that puts it all together. The massive quarter muscle expression from his fullblood sire Oakview Fineprint, a smooth front third and small head combining into a big ribbed soft made soggy middle - this bull has it going on. I always appreciate a good hair coat and Major certainly has this in abundance. His dam is a big made high capacity Tymarc female with great dark red hair coat, and a tidy udder.

Polled Purebred. Moving into the next fullblood cross calf is a bull off of a perfect goggled black purebred first calf heifer, and our fullblood heifer bull, Jimmy. Coming into the world small and growing like a bad weed, 147M has a good calving ease EPD spread and phenotype to draw some attention on sale day. MARS has an attractive head with the sought after 'money strip', a nice neck and great general structure. His length is deceiving in that his top, hip, and quarter are quite full, but he is extremely balanced. Back to 147M's dam, we have a hard-working moderate made NorthStar female, and likely our biggest middled cow (110B) all the way back in the great granddam position. Lots of capacity in this bloodline

Absolute sale feature right here, and Jamie's pen favorite. If you are looking for a bull with a low BW and high WW and YW, with 12/13 EPD traits above breed average, and an outcross pedigree you won't see anywhere else – make a bunch of stars on Lot 30. Mufasa has always stood out right from day 1 with a perfect blaze. His absolute power in muscle mass, and bone are simply impressive, especially when you get him on the move and see him track out on big square feet. This bull has length and hip to spare and a hair coat that works in the deepest of cold snap. Maternally, I may need more space if I don't edit myself. 450E is a fantastic red female that can't be faulted, and is expected to be as such going back to the great 93T cow. Lots of longevity, mass, and structure in this pedigree, and I can't say enough about the homerun this calf has turned out to be.

These Madden sons are so darn good, it's tough not getting excited when I think about them heading out to work. League is a fitting name for 89L as he is in a league of his own. The pen heavy weight has style, and presence that is hard to find with such stellar curve bending EPD spreads so full of performance. Added bonus for this guy is his meager 95lbs BW. I just can't fault 89L, he is so easy to keep around, he has the trait checklist full in all departments, and his story on paper in EPD land is every bit as good. His dam is quite often remarked as one of our fanciest females and some times argued as our best solid red cow. She has a perfect udder and leg set, and a nice spring of rib situation in a soggy make up. We typically enjoy the females from her, with her most notable heifer selling in the World Simmental Sale this past summer, but her first bull calf has been warmly welcomed. Good honest red bulls like this are hard to come by, and League deserves a long look and a bunch of stars on sale day.

Lorik is a deep dark red hairy Madden son with tons of top and capacity. He is very well made and has a nice slender shoulder. His ample quarter is a great attribute that is surely noticed while he tracks out effortlessly on a nice big dark foot. His dam is a sweetie Tymarc female with a tidy udder, great feet, and a dark red hair coat. With Madden departing the herd this fall his last calves are just hitting the ground now, and it's hard to say how many liver red 31/32 purebreds will grace the pages of the Spring Select catalog next year, so please don't let this great bull pass you by.

Horned, Dilutor Free

Our first fullblood catalogued this year is a Madden son with tremendous pigmentation and a deep dark liver red hair coat. He is big topped and long made, with a good quarter and a nice big foot. We always appreciated Madden for his feet and legs. A big made athletic bull in his own right, Madden passed on these traits to his offspring. Statistically Leader is just that with a fullblood EPD spread to be envied with 8 of 13 traits above average, and a milk EPD in the top 1% for the breed. His great milk numbers are of no surprise with our best fullblood cow from Eagle Ridge in the background – BDB 12A, a direct Impact daughter. The maternal is deep and powerful in Leader and I sure hope you find him on sale day.

Polled Fullblood

Motley Crude is a very nice polled representation of our typical Madden fullblood calves. Long, smooth, big topped and refined all over – 135M should have some friends come sale day. This calf was on display down at Clearwater Simmentals this past summer for the World Fleckvieh Congress, and we were sure proud to show him off. His polled Silver lake Rocky momma cow is a big made deep power cow with a beautiful head, and excellent feet. Here again when talking about Madden sons, I need to mention the excellent numbers, 8/13 traits above breed average, and all indications pointing toward Motley Crude making some excellent replacement daughters. Foundation sort of maternal is hardwired right into this fancy made polled fullblood, so take a long hard look at lot 34.

Horned. Rhett's first bull for sale this year is a real eye catcher, that I'm certain will have some friends come sale day. He is huge hiped and quartered and has major league top in him. His tidy skull and fantastic leg set are surely appreciated and very noticeable when striding out in the pen. Snowfight's dam is a sweetheart moderate made fullblood off a bulletproof Rolex female. We have a tendency of keeping this bloodline in the herd as the females are so predictable and rock solid in the foot and udder department, not to mention the great job they do weaning nice big calves. On paper 150M is impressive with a low BW and high-performance numbers. Be sure to take a stroll by 150M's pen sale day and ask Rhett for the full rundown; I think you will be surprised how much a nine-year-old can tell you about cattle!

Polled Fullblood. Rhett's next bull for sale this year is the result of a lot of hard work and anticipation, following a major success in the sale of his first Junior club steer project. Our friends the Loomis's were very generous and purchased Rhett's steer after a long conversation they had with him involving his desire to reinvest his steer money into purchasing a bred heifer fall. With each female sale catalogue that arrived in the mailbox, Rhett was quick to analyse mark pages feverishly, until he announced that he had made his selection and we were to a trip out to Black Gold! Fast forward 18months and here we are writing the description the resulting calf from Black Gold Miss Petunia 146K. This polled Jesse James son is long smooth, with the muscle in the right places and excellent feet and legs. Petunia is a breed-specimen for sure with many admirers (including Rhett's brothers and Mom and Dad) that walk the pastures and pens. Excellent EPD's and performance numbers all with an ultra low BW, this bull is a heifer pen candidate!

[illegible]

Welcome everyone to the 2025 Spring Select Bull sale, Once again we like to say thank you to Chet, Jamie and the boys for including us in this great sale. We are pretty excited about our group of bulls on offer this year as 2024 was an exciting calving season for us as we added a great group of new mature cows from Skywest Simmentals. When Cody & Riley called and told me they were taking over the majority of the Virginia Ranch herd and there was a chance I could acquire some new bloodlines I quickly pinned on to the cattle liner before they could change their minds.

Not only did this group of cows come with a long line of proven genetics from around the country, they came bred to some of the best bulls in the fullblood industry and we are proud to offer them this year.

Along with this great opportunity we also were able to get our hands on some incredible bred heifers from Virginia Ranch, Beechinor Brothers and J.E.M Simmentals and also built a herd bull line up of some of the hottest fullblood bloodlines on the market right now such as Sugar Ray, Rumble, Elevation & Viper.

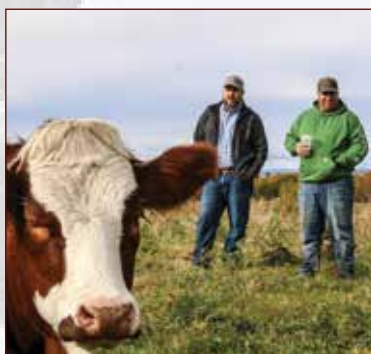

Our bulls were all raised on our ranch just north of Dawson Creek BC, we weaned and pulled the bulls off pasture September 8, 2024, from then on they were fed a barley/oat silage mix along with a 16% protein pellet supplied by Bullseye Feeds and free choice alfalfa hay. All our feed ingredients were tested and balanced to allow the animal to show their natural growing abilities and achieve a strong ADG without harming their long-term development.

We stand behind our animals and are always ready for a bull tour, call or stop by anytime.

The Canadian record selling bull, sold for \$355,000 dollars and we were lucky enough to put 3 of his direct sons in our bull sale. Raised by Beechnor Land & Livestock and purchased by Skywest Simmentals & Beechnor Bros. This exciting herd sire produces heavy, thick and wide bull calves with many weaning off over 900lbs, and his daughters are not too far behind. Rumble has made his mark in the fullblood world as well as in our herd.

- "Warmax 232M" is a MJB War Cry 8G son who will be one of the last ones available as he's not on the Skywest ranch anymore. War Cry was used on heifers with a ton of grow in his calves as you can see here with excellent disposition as well.
- Warmax had a lot of friends this summer as he stood beside his dam Miss Duramax as they both have the perfect hair and color for the north.
- With a birth weight of 91lbs and a wean weight just shy of 800 his mother did an excellent job as a first time calver

- Another son sired by MJB War Cry 8G
- We were able to purchase "Warwyks" mother as an open heifer from the Virginia Ranch bull sale, she also did a bang up job raising this stout bull in her first year as a mother.
- He is thick and wide like his brother with just a shade lighter hair color
- Only a 80lbs birth weight but still tipping the scale at 790lbs at weaning time (August 9th)

- Milton is our only MMWK Lambeau 64J son on offer this year, he is a mini version of his sire, clean smooth shoulders walking on a great set of feet.
- Thick coat of hair is passed down to all Lambeau's offspring, perfect for the cattle in the North
- With only a 85lb birth weight and being one of the youngest bulls in the pen Milton has been doing a pretty good job of playing catch up

- Due to a injury early in the breeding season this is the only son out of Skywest POL Admiral, which is such a shame, he had it all as a perfect polled heifer bull package
- Don't shy away from this guy if you're looking for a heifer bull prospect, with a 78lb birth weight, smooth shoulder line, this guy has calving ease all over him
- Extremely quiet and easy to get along with
- Smooth tidy skull

- Rover is a son out of the NUG Rambler 228K bull who was the lead off full-blood bull from Maxwells Simmentals sale in 2023, that was purchased by Skywest Simmentals and Wolfe Farms for \$45,000 and we were lucky enough to get a few cows bred to him.
- Rover is a real quiet guy in our bull pen, never causing any problems and easy to handle
- This guy has a nice hip, good hair and is very correct
- "Rover 119M" will sire some thick soggy calves that will ring the bell on sale day

- This bull will definitely leave his mark on his calves in the fall, himself weaning off at just shy of 850lbs was impressive for the dry year we had.
- His sire SBV Landmark 548J has sold sons at the Virginia Ranch/Skywest Bull sale in Innisfail Alberta the last couple years averaging \$13,000 and bred heifers averaging \$10,000
- This guy has two incredible sisters in our bred heifer program be sure to watch for them in the Western Harvest sale later this year

DREAM. GROW. THRIVE.

Terms and Conditions

TERMS - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES - Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE - Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS - There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

ANNOUNCEMENTS - All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - A registration/recording certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price. **EXCEPTION TO GUARANTEE** - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

EMBRYO & SEMEN - Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

TRANSCON LIVESTOCK CORP. IS AGENT ONLY - It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.
